

Color Fashion 2000

Color Fashion 2000

Color Fashion 2000 è un nuovo indice colori realizzato da Laboratorio di Colorimetria Italiano per rispondere alle richieste che ci giungono dal mercato.

Color Fashion 2000 contiene la gamma colori per tutti i modelli di auto prodotte nel 2000, con un'unica eccezione: **Ford**, la gamma colori inizia dal 1996, viste le difficoltà che i clienti incontrano nell'interpretare i complicati codici colori.

Color Fashion 2000 contiene tinte relative a modelli / colori non ancora immessi sul mercato automobilistico: nei suddetti casi non troverete la cip di riferimento colore nel CPS, in quanto verrà pubblicata appena riceveremo gli master definitivi dalla casa automobilistica; in caso di necessità potrete rivolgervi al nostro servizio Assistenza "Colorimetria Glasurit".

Color Fashion 2000, contiene per alcune case automobilistiche, informazioni aggiuntive riferite a codici bicolore, paraurti e vano motore. Vi ricordiamo che per un maggior dettaglio di queste informazioni potete sfogliare Color List 101, (indice cartaceo o CD-rom).

Color Fashion 2000 verrà pubblicato una volta all'anno e conterrà le informazioni dell'anno di riferimento: conservandolo accuratamente, vi creerete negli'anni "**archivio storico**"
