SUSTAINABLE SOLUTIONS FROM GLASURIT.

For over 20 years, Glasurit has set standards for sustainable products and services. Glasurit already offered low-solvent products early on, introducing its waterborne 90 Line basecoat system back in 1992.

In the years that followed, the focus was shifted to efficient processes. In response to this, we developed especially time- and material-saving products and solutions and expanded Glasurit's training portfolio. For over 15 years, our services have included a comprehensive consultancy portfolio.

Now, Glasurit is helping you experience sustainability using interactive Augmented Reality technology. Simply download the Glasurit Sustainability app from the Apple App Store and use your smartphone or tablet to activate it by scanning the image on the title page of this brochure. The app will recognize the Tesla Model S. A Glasurit parrot in 3D animation provides information items on sustainability that you can then activate with your finger. The eight sustainability categories presented inside this brochure are brought to life with texts, images and videos accompanied by facts and figures.

Download the **Glasurit Sustainability** app in the App Store.

You can use the app to scan the image on the title page of the sustainability brochure and get all the relevant information.

SAVING COSTS

Here's how we help our customers save costs:

- ▶ Our process optimization training courses cut working time and costs.
- ▶ Glasurit RATIO Scan II + CPS = No more spray-outs needed!
- ▶ Working with our Gray Shade Concept saves up to 40% of the material.
- ▶ Glasurit 5S can boost productivity by up to 10%.

SAVING ENERGY

Here's how we help our customers save energy:

- ▶ Our wet-on-wet fillers dry outside the oven in only 10 to 15 minutes.
- ▶ Glasurit 923-610 HS Clear requires only 10 minutes for drying at a panel temperature of 60°C.
- ▶ Glasurit 523-65 Air-Drying Additive reduces curing of 923-610 Clear at 20°C from six to around two hours.

LONGEVITY

Here's how we promote longevity:

- ▶ Our paints extend vehicles' lifespan.
- ▶ 90 Line mixing bases have a shelf life of 5 years, which is twice as long as other products on the market.
- ▶ Our 923-630 clearcoat is one of the most resilient and weather-resistant products of its class.

HEALTH AND SAFETY

Here's how we contribute to health and safety:

- ▶ Occupational safety and health are important components of Glasurit training courses. They help us prevent adverse health effects.
- ▶ The use of the wet-on-wet filler eliminates sanding, and in turn, the sanding dust, which pollutes the air we breathe.

REDUCING EMISSIONS

Here's how we reduce emissions:

- ▶ The excellent hiding power of 80-M mixing base concentrates reduces material consumption and thus decreases solvent emissions.
- ▶ The solvent content of Glasurit 176-72 1K Primer Filler was reduced by 40%.

AVOIDING WASTE

Here's how we help avoid waste:

- ▶ Our Glasurit RATIO Spot Repair cosmetic repair concept reduces time-consuming masking to a minimum.
- ▶ With our color tools, our customers no longer need spray-outs.

CONSERVING RESOURCES

Here's how we help our customers conserve resources:

- ▶ With our Gray Shade Concept, up to 40% of the topcoat material can be saved.
- ▶ Our Primer Filler Pro saves an entire process step (priming).
- ▶ We offer training in using resources sustainably.

CLIMATE PROTECTION

Here's how we contribute to climate protection:

- ▶ We train our customers in using methods for saving CO₂.
- ▶ Our 90 Line basecoat system and our wet-on-wet fillers air-dry.
- ▶ Our 45 training centers world-wide make for short distances to training courses.
- ▶ Glasurit 923-610 HS Clear Fast Drying takes only 10 minutes to dry at a panel temperature of 60°C.
